Subject: BSAF Database Information
Naval Station Newport, Newport Rhode Island

Dear Ms. Keckler:

In regards to your e-mail request of Curt Frye dated July 30, 2004, I am providing to you a CD containing pertinent information collected at NAVSTA since 1996.

Since your request was specific to chemical data that have been measured and reported for biota (fish/shellfish) and sediment, the most pertinent documents for the Newport sites were determined to be the Ecological Risk Assessment Reports (ERAs) for Sites 09 (OFFTA), 19 (Derecktor) and 01 (McAllister). The ERAs and their Appendices are more likely to contain the information needed for the database than are the RI or later reports.

If you have any questions regarding this material, please do not hesitate to contact me

Very truly yours,

Stephen S. Parker, LSP
Project Manager
